Re: Proposal for AI-powered Credit Intelligence — digitizing secured MSME and corporate lending to complement Anbesa Plus and the Bank's digital channels

Dear Sir/Madam,

On behalf of Seqela, we are pleased to submit the enclosed proposal for Lion International Bank's consideration — a proven **AI-powered Credit Intelligence** platform for secured MSME and corporate lending that complements Anbesa Plus, Anbesa Online, and the Bank's SBS digital banking stack.

Anbesa Plus and the SBS Digital Banking Suite have strengthened retail and agency channels for hundreds of thousands of customers. The enclosed solution addresses the complementary need: branch-driven institutional credit where cashflow appraisal, GPS-governed collateral, document authentication, and multi-level committees determine portfolio quality and turnaround time.

The platform digitizes end-to-end secured lending — bilingual (English + Amharic) document authentication, a seven-step cashflow appraisal (MSME and corporate modes), field collateral with offline tablet support, and configurable Branch → District → Head Office committee decisioning — integrating with core banking for customer prefill while leaving disbursement in the Bank's system of record.

The proposal includes live system screenshots, a DECSI reference case, and a six-month path to a controlled pilot. We respectfully request a 90-minute live demonstration for Credit, Digital Banking, IT, and Risk leadership, and are ready to commence discovery upon your guidance.

Thank you for your time and consideration.

Yours sincerely,

For Seqela
