

PRODUCT PRESENTATION FOR DECSI MANAGEMENT

Dedebit Credit and Savings Institution S.C.

AI-powered Credit Intelligence

A walkthrough of the system Seqela built for DECSI — what is live in production today, and the credit factory built around it.

Product presentation

19 August 2026

Confidential

Seqela · info@seqela.com · +251 964 790 724

AGENDA

What We Will Walk Through

- 01 The live system at DECSI today

- 02 Queue, users, branches, loan types, collateral types

- 03 Operating results from production

- 04 The credit factory built around that queue

- 05 Documents, appraisal, GPS collateral, committees

- 06 Digital Apply, intelligence, post-approval & controls

- 07 Roles and core-banking fit

This is a product walkthrough — not a commercial pitch. Price and terms are in the financial proposal.

IN PRODUCTION AT DECSI

The Current Live System

Seqela developed this for DECSI at no charge. These five modules are what staff use today.

Exact: ETB 29,562,221,974 requested · ETB 17,025,387,000 approved · 1,762 rejected (ETB 1.37B) · ~76% of approved amount disbursed.

THE PRODUCT AROUND THE QUEUE

Credit Factory — End to End

Green pills are live at DECSI today. The rest is the system built around that queue, ready to configure.

[Queue →](#)[Digital Apply →](#)[Documents / OCR →](#)[7-step appraisal →](#)[GPS collateral →](#)[Committees →](#)[Post-approval →](#)[Agentic Assist →](#)[Seqela Market →](#)[Finance disbursement](#)**Customer path**

1. Digital Apply — register with DECSI customer number
2. Details → documents → fee (or waived) → submit
3. Queue ID, status, and notices
4. After credit approval — repayment schedule

Staff path

1. Online intake or branch create (today's queue)
2. Documents, 7-step appraisal, GPS collateral
3. Committee vote or return-to-officer
4. Post-approval conditions → Finance disbursement

Application documents – HK-000015919

Applicant: Aster Bekele Trading PLC

Upload documents

Files are validated **before upload** (extension, size, file type, and document content when configured). Uploading again for the same document type **replaces** the previous file.

Rules per type: **Settings** → **Application document types**. Validation errors appear in the **red banner** at the top of this page after you submit.

Current uploads

Required types, English + Amharic OCR, identity match, verify / reject — incomplete packs stop early.

This sheet: requirements met — (1) Basic info and loan request.

Sheet 1: Basic Info & loan request

Client and business information. Applicant name, phone and amount are from the loan request. Badges show where each value came from. Fill order: **core banking** → **documents** → **officer**.

Core banking lookup

Customer number

0078521456

Look up & fill from core banking

Empty fields fill automatically. Differing values appear below for confirmation (banking wins when accepted).

Appraisal Sheet 1 — 7-step wizard, workbook requirements, look-up from core banking.

7-STEP CASHFLOW APPRAISAL

One Methodology — MSME and Corporate

Sheet 3: Cashflow analysis

Phase 0–2: monthly aggregates, optional P&L breakdown (Phase 1), and annual repayment capacity (Phase 2).

From Sheet 1 / loan request (reference): Amount requested: **2500000.00** · Term: 36 mo · Rate: 16.50% · Repayment: Monthly
Annual debt service uses 12 payment(s) per year from repayment frequency (installment × payments/year).

Phase 1 – Monthly P&L breakdown (optional)

If any expense line below is filled, their sum becomes Monthly business expenses. If Monthly business income is empty, Monthly sales is used as business income.

Cf monthly sales:	Cf monthly cogs:	Cf monthly salaries:	Cf monthly rent:
1850000.00	1280000.00	145000.00	45000.00
Cf monthly utilities:	Cf monthly transport:	Cf monthly other operating:	Cf monthly taxes:

Sheet 3 cashflow — DSCR, stress, annual capacity, 12-month grid. The analytical heart of MSME underwriting.

Sheet 6: Summary & decision

Recommendation, strengths/weaknesses, committee comments and approved terms. The **explainable credit scorecard** below is the system source of truth for committee (not the Excel key-indicator matrix). Warnings and hard blocks use thresholds from **Admin** → **Loan analysis policy**.

Analysis assist

Read-only prompts from scorecard, bureau, and mode — not an auto-approve decision.

Weak Environmental & social pillar — 5/15 — E&S eligibility not set [Sheet 4](#)
Bureau band: A — Score 712.00 [Sheet 2](#)

Officer checklist (MSME / cashflow)

Sheet 6 summary — explainable scorecard and officer recommendation that feeds committee.

Sheets also cover character, E&S, collateral worksheet, and amortization. Corporate mode uses the same seven steps.

GPS COLLATERAL

Field Evidence Committees Can Trust

Field visit — site → BOQ → photos → review; GPS pin; offline tablet for weak connectivity.

Evidence pack — coverage, GPS map, BOQ totals, photos, engineering QA, reconstructable dossier.

APPROVAL COMMITTEES

Complete Packs, Amount-Routed Votes

Date Requested:mm/dd/yyyy

Committee queue — Branch → District → Head Office → Management, by amount threshold.

Approval committee review

HK-000015919 — Aster Bekele Trading PLC | Branch: Mekelle No Two | Requested: 2500000.00

Overall: Pending committee

Current level: Branch approval committee

Submitted 07/25/2026 9 a.m. by zemeo

Officer notes: Strong MSME cashflow case. Annual DSCR 2.61, collateral coverage 8.36x, bureau Band A. Recommend approval of ETB 2,500,000 for working capital.

Approval routing

Amount used for routing: 2500000.00 (Sheet 6 recommended)

Levels this loan will follow:

1. Branch approval committee

2. District approval committee

3. Head office approval committee

4. Management approval committee

Vote — approve, decline, or return to officer with notes. Pack includes scorecard, DSCR, E&S, GPS.

BEYOND ORIGATION

Modules F–J — Full Credit Factory**CUSTOMERS****Digital Apply**

Register, apply, upload docs, pay/waive fee,
Queue ID, notices, schedule after approval.

POST-APPROVAL**Closing → Finance**

Conditions, legal collateral pack, e-signatures,
Finance disbursement queue.

STAFF AI**Agentic Assist**

Copilot with hard rails — cannot approve or
disburse.

MANAGEMENT**Credit Intelligence**

Portfolio KPIs, officer workspaces, collateral
analytics.

RISK & IT**MFA · Delegations · Risk Desk**

TOTP, audit export, admin-approved cover,
pre-committee gate.

MARKET · BOOK**Seqela Market + book ops**

Dealer/co-op price bands; monitoring and
collections after disbursement.

WHO USES WHAT

Roles, Core Banking, and Deployment

CUSTOMERS**Digital Apply**

Register, upload documents, pay or waive the fee, keep a Queue ID, see notices and the schedule after approval.

OFFICERS**Queue plus factory**

Today's queue stays. Documents, appraisal, GPS, Assist, and delegations sit on the same file.

CREDIT, COMMITTEE, FINANCE**Pack to disbursement**

Votes on complete dossiers. Post-approval conditions. Finance marks ready and disburses.

IT, RISK, MANAGEMENT**Control**

On-premises Docker / PostgreSQL. MFA and audit. Digital Apply open/close. CBS remains the system of record for accounts.

The Hub is the credit factory. Core banking stays the book of record. There is no CBS rip-and-replace.

CLOSE

The System Is Here to Walk Through

What you have seen

1. The **live system at DECSI** — queue, users, branches, loan types, collateral types
2. Production volume on that system — 53,901 files · ETB 17.03B approved · ETB 13B+ disbursed
3. The **credit factory** built around it — documents, appraisal, GPS, committees, Digital Apply, Assist, closing pack, Finance disbursement

A live demonstration can continue from any screen in this pack. Commercial terms are in the financial proposal (SEQ/DECSI/FIN/2026-08).
