Re: Technical and financial proposals for AI-powered Credit Intelligence — submitted to management; next phase is formal documents and committee presentation

Dear Members of Management,

Following DECSI's request, Seqela submits a technical and business proposal together with a priced financial proposal for institution-wide license and deployment of the **enhanced** AI-powered Credit Intelligence platform.

Seqela **developed the current live system for DECSI at no charge**. What is deployed today is **queue management, user management, branch management, loan type management, and collateral type management**. On that system DECSI has already processed **53,901** applications, approved **ETB 17,025,387,000** for **25,397** customers, and disbursed more than **ETB 13 billion** (from ETB 29,562,221,974 requested). The ETB 5 million in this offer is not payment for that past work — it is the price to license and deploy the **new system**: document authentication, 7-step appraisal, GPS collateral, multi-level committees, Digital Apply, Seqela Market, Agentic Assist, Credit Intelligence, MFA, delegations, and post-approval through disbursement.

Total price: ETB 5,000,000 including 15% VAT, covering a perpetual institution-wide license, implementation and rollout, training, and Year-1 warranty. After the warranty year, annual maintenance is **10%** of this price (ETB 500,000 per year, including VAT). Work outside the agreed scope is done only by written agreement. Prices are valid 90 days from 15 August 2026.

We respectfully request management endorsement of this pack so the next phase can proceed: compilation of formal documents and presentation to the relevant committee.

Thank you for the partnership that made the current live system real. We look forward to deploying the credit factory with DECSI.

Yours sincerely,

For Seqela
