Re: Financial proposal for institution-wide license, rollout, training, and support of AI-powered Credit Intelligence — for management consideration and onward committee presentation

Dear Members of Management,

Following DECSI's request, Seqela submits this financial proposal together with the companion technical and business proposal. Seqela **built the current live system for DECSI at no charge** — queue, user, branch, loan-type, and collateral-type management. That system has already processed 53,901 applications and approved ETB 17.03 billion. This offer is only for licensing and deploying the **new credit-intelligence system** network-wide.

We respectfully request management endorsement of this pack so it can proceed to the next phase: compilation of formal documents and presentation to the relevant committee.

Total price: ETB 5,000,000 including 15% VAT. After the warranty year, annual maintenance is **10%** of this price (ETB 500,000 per year, including VAT). Work outside the agreed scope is done only by written agreement. Prices are valid for 90 days.

We remain available to walk management and the committee through both the technical and financial documents.

Yours sincerely,

For Seqela

Document control

ITEM	DETAIL
Audience	DECSI Management; thereafter Finance, Procurement, and the evaluating committee
Purpose now	Secure management endorsement of technical + financial terms
Next phase	Formal document pack and committee presentation
Currency	Ethiopian Birr (ETB). The total price of ETB 5,000,000 includes 15% VAT .
VAT	Included in the 5 million (VAT portion ETB 652,174 · net ETB 4,347,826)
Validity	90 calendar days from 15 August 2026
Hosting	On-premises or DECSI private cloud; DECSI-controlled data residency

1. Purpose, Audience & The Ask

The ask of management: Endorse this financial proposal (total **ETB 5,000,000 including VAT**) and the companion technical proposal so Seqela and DECSI can proceed to formal documents and committee presentation — to license and deploy the **new enhanced system** network-wide.

Seqela **developed the current live system for DECSI at no charge**. What is in production today is **queue management, user management, branch management, loan type management, and collateral type management** — not the full credit factory. That queue system has already processed 53,901 applications and approved ETB 17.03 billion. The ETB 5 million is **not** payment for that past work. It is the price to deploy the **new system**: documents and OCR, 7-step MSME/corporate appraisal, GPS collateral, multi-level committees, Digital Apply, Seqela Market, Agentic Assist, Credit Intelligence, MFA, staff delegations, and post-approval through disbursement.

Why a separate financial proposal

DECSI requested a proposal and a financial proposal for management. Ethiopian committee evaluation typically requires: (1) a technical/business case, (2) a priced commercial offer with VAT, payment terms, and inclusions, and (3) a presentation pack. This document is item (2).

This phase — Management

- See what was built free and the live results
- See new features and what go-live delivers
- Endorse ETB 5 million for documents and committee

Next phase — Documents & committee

- Formal contract / ToR annexes
- Committee presentation of both proposals
- Negotiation and award path

1b. Current Deployed System — Built for DECSI at No Charge

What is live at DECSI today: Seqela built, at no charge, a production system for **queue management, user management, branch management, loan type management, and collateral type management**. The figures below are live operating results from that system — not projections, and not the new credit factory.

53,901 Applications processed	17.03B ETB approved	13B+ ETB actually disbursed	25,397 Customers approved
---	-------------------------------	---------------------------------------	-------------------------------------

WHAT IS DEPLOYED TODAY (FREE)	WHAT IT DOES
Queue management	Loan requests in a digital queue; status and assignment
User management	Staff accounts and roles
Branch management	Branch / district structure
Loan type management	Loan products / categories
Collateral type management	Collateral type catalog

METRIC (CURRENT LIVE QUEUE SYSTEM)	EXACT FIGURE
Total loan requests processed	53,901
Amount requested	ETB 29,562,221,974
Amount approved	ETB 17,025,387,000
Customers approved	25,397
Customers rejected	1,762 (ETB 1.37 billion)
Amount actually disbursed	ETB 13 billion+
Share of approved amount disbursed	~76%
Amount approval rate	57.59%
Customer approval rate	47.12%

Appraisal, GPS collateral valuation, document OCR, committees, Digital Apply, and the other modules in Section 1c are **not** in the current deployment. They are what the ETB 5 million puts into production.

Reference: Tsige Bayray, Vice Chief of IT, DECSI · +251 914 701 978.

1c. New Features — What DECSI Gets When the New System Is Deployed

The ETB 5 million deploys the **new credit-intelligence platform** on DECSI infrastructure. It *replaces* today's queue-and-admin deployment with a full credit factory. DECSI keeps the proven queue, users, branches, loan types, and collateral types — and gains the modules below.

What is new vs what is already live

ALREADY LIVE AT DECSI (BUILT FREE)	GOES LIVE WITH THIS ETB 5 MILLION
Queue management	Document authentication (OCR Eng+Amh), identity match, verify/reject
User management	7-step MSME and corporate cashflow appraisal, DSCR, E&S, scorecard
Branch management	GPS collateral, construction BOQ, field visits, evidence packs, engineering QA
Loan type management	Multi-level credit committees, votes, return-to-officer
Collateral type management	Digital Apply, Seqela Market, Agentic Assist, Credit Intelligence, MFA, delegations, post-approval → disbursement

MODULE	WHAT GOES LIVE
Documents & OCR	Configurable packs, English + Amharic OCR, identity match, verify/reject — not in the current deployment.
7-step appraisal	MSME cashflow and corporate modes: qualitative, DSCR, E&S, scorecard, amortization. Excel/PDF packs.
GPS collateral	Construction BOQ × woreda unit prices, land, movable, GPS field visits, offline tablet, evidence packs, engineering QA.
Committees	Configurable multi-level votes, amount routing, return-to-officer, cooperative intake gate.
Digital Apply	Customers register with DECSI customer number, apply online (details → documents → processing fee → submit), receive a Queue ID, track status, read notices, and — after credit approval — view the repayment schedule. Staff see online files in <i>Online loan intake</i> with auto-assign to the branch officer.
Seqela Market	Dealers, brokers, suppliers, and cooperatives report local prices (guest or registered). DECSI gets area price bands for collateral and credit work.
Agentic Assist	Staff floating chat: draft a loan “story”, bootstrap a request, document checklist, read appraisal. Cannot approve, value collateral, or disburse — policy gates stay with humans.
Credit Intelligence	Portfolio KPIs, officer and manager workspaces, collateral risk views, decision-support dashboards.
MFA & security	Authenticator MFA, password reset, lockouts, session timeout, security audit log and export for Risk / IT / Audit.
Staff delegations	Temporary cover of another officer’s authority (admin-approved). Work continues when staff are on leave; “Acting by delegation” is visible on screen.
Post-approval → disbursement	Conditions checklist, repayment schedule confirm, mark ready, Finance gate, mark disbursed (CBS booking optional).
Cooperative intake queue	Branch Cooperative gate before loan-officer work on branch files.
In-app Help & manuals	Role Help in hub, Digital Apply, and Market; printable admin / staff / customer / IT manuals.

What each DECSI audience gets on go-live

Customers

- Apply from home — no repeat branch trips for the first pack
- Pay processing fee online (or waived when set to zero)
- Queue ID, status, notices, repayment schedule after approval

Branch / loan officers

- Online files land in the hub, assigned to the branch
- 7-step appraisal and GPS collateral (new — not in today’s queue system)
- Delegations so cover does not stop the queue

Committees / Credit / Finance

- Complete packs: scorecard, DSCR, E&S, GPS evidence, votes
- Post-approval conditions then Finance disbursement queue
- Credit Intelligence for pipeline and portfolio view

IT / Risk / Management

- On-premises Docker/PostgreSQL; data stays at DECSI
- MFA, audit log, lock/unlock, Digital Apply open/close
- One methodology network-wide; reconstructable dossiers

Go-live outcome: one licensed credit factory for every branch — customers apply online, officers underwrite in the hub, committees vote on complete packs, Finance disburses against a ready file, and management sees the pipeline. Year-1 support and training are included in the ETB 5 million.

2. Commercial Summary — Total ETB 5,000,000 including VAT

5.00m Total including VAT (ETB)	4.35m Of which net (ex-VAT)	10% Annual AMC after warranty	0.50m AMC / year (ETB, incl. VAT)
---	---------------------------------------	---	---

LINE	DESCRIPTION	ETB (INCLUDING VAT)
A	Perpetual institution-wide software license — new credit factory (documents, appraisal, GPS collateral, committees, Digital Apply, Market, Assist, CI, MFA, delegations, post-approval) including the queue/admin already live	3,250,000
B	Implementation, configuration, CBS customer-lookup hooks, and network rollout (agreed waves)	1,250,000
C	Training, trainers-of-trainers, and change-management pack	500,000
D	Year-1 warranty, hypercare, and support (12 months from acceptance)	Included
Total price (including 15% VAT)		5,000,000
Of which VAT 15%		652,174
Of which net (exclusive of VAT)		4,347,826

The current live system was developed at no charge. This ETB 5,000,000 **including VAT** is the full contract price to license and deploy the new system. License is perpetual for DECSI as an institution. After the warranty year: **10% annual AMC** (ETB 500,000 including VAT). Work outside this agreed scope is done only by written agreement (Section 7).

Value context: The current queue system — built free — has already approved ETB 17.03 billion. ETB 5 million including VAT is about **0.03%** of that approved book, to deploy the full credit factory.

3. Scope of Supply

The financial offer covers the new credit factory in Section 1c, including the queue/admin capabilities already live. In summary:

AREA	INCLUDED IN THIS PRICE
License	Perpetual, institution-wide use for DECSI staff, Digital Apply customers, and Market reporters. Unlimited named staff users.
Already live at DECSI (built free)	Queue, user, branch, loan type, and collateral type management — volume proven (53,901 files · ETB 17.03B approved)
Documents & OCR (new)	Configurable types, Eng+Amh OCR, identity match, verify/reject
Appraisal (new)	7-step MSME and corporate cashflow; DSCR; E&S; scorecard; amortization
GPS collateral (new)	BOQ catalog, field visits, offline tablet, evidence packs, engineering QA
Committees (new)	Multi-level votes, amount routing, return-to-officer, cooperative intake
Digital Apply (new)	Customer register/apply/fee/submit, Queue ID, notices, repayment schedule; staff online intake + auto-assign.
Seqela Market (new)	Guest and registered local price quotes; area price bands for collateral and credit.
Agentic Assist & Credit Intelligence (new)	Policy-gated staff chat; KPI and officer/manager workspaces. Cannot approve or disburse.
Security & cover (new)	MFA, password reset, lockouts, security audit; admin-approved staff delegations.
Post-approval (new)	Conditions, schedule confirm, mark ready, Finance disbursement queue.
Integration (base)	CBS / party customer-number lookup and conflict-aware prefill. Maps (Gebeta/OSM).
Deployment & training	Docker / PostgreSQL on DECSI infrastructure; ToT; manuals; Year-1 hypercare.

Work outside this agreed scope (for example deep CBS disbursement posting, a live bureau connector, extra on-site waves, or new modules) is done only by written agreement — see Section 7.

4. Detailed Pricing

A. Perpetual software license — ETB 3,250,000 including VAT

- Institution-wide right to use the new Credit Intelligence platform for DECSI's Ethiopian operations — including queue/admin already live plus the new modules in Section 1c.
- Covers all current and future branches, districts, and head-office departments of DECSI.
- Unlimited DECSI staff users; no per-seat fee. Digital Apply customers and Market reporters included under DECSI's operation.
- Source / deployment artefacts for on-premises operation under the license terms.
- Does not transfer Seqela intellectual property ownership; DECSI receives a perpetual usage license.
- The current live queue/admin system was developed at no charge; this line licenses that work and deploys the new credit factory for ongoing institutional use.

B. Implementation, configuration & rollout — ETB 1,250,000 including VAT

- Requirements confirmation workshop (policy, products, hierarchy, committee thresholds, Digital Apply fee, KPIs).
- Configuration of branding, roles, products, appraisal modes, collateral catalog, Digital Apply, Market, notifications, MFA policy.
- CBS customer-lookup hook-up with DECSI's nominated CBS counterpart.
- UAT support, defect correction, and production hardening.
- Network rollout in agreed waves (pilot districts/branches then scale), including hypercare at each wave.
- Project management, weekly status, and acceptance records for committee audit.

C. Training & change management — ETB 500,000 including VAT

- Trainers-of-trainers for Credit, Branch, Engineering/Collateral, Finance, Risk, and IT.
- Role-based sessions (loan officer, branch manager, committee voter, engineer, admin).
- User manuals (staff, customer/digital apply, admin/IT) already prepared; updated to the accepted configuration.
- Cascade pack so DECSI can train remaining branches internally.

D. Year-1 warranty & support — included

- 12 months from formal acceptance (or network go-live of the first agreed wave, whichever is specified in the contract).
- Bug fixes, security patches, and reasonable configuration support.
- Named Seqela support channel; severity-based response as in Section 6.
- Does not include work outside the agreed scope (Section 7) or DECSI infrastructure (servers, network, CBS vendor fees).

5. Payment Schedule & Milestones

Payments are due in ETB to Seqela against invoice. Percentages apply to the total price of **ETB 5,000,000 including VAT**.

TRANCHE	MILESTONE	SHARE	ETB INCLUDING VAT
1	Contract signing / purchase order	30%	1,500,000
2	Configuration complete & UAT signed	40%	2,000,000
3	Network go-live of agreed first wave	20%	1,000,000
4	End of 90-day post-go-live warranty holdback	10%	500,000
Total (including 15% VAT)			5,000,000

VAT 15% is already included in each tranche (total VAT portion ETB 652,174). If withholding tax applies, DECSI shall provide the official receipt.

Committee-friendly structure: DECSI pays against evidence — contract, UAT sign-off, go-live, then a 90-day holdback. No large residual after the factory is in daily use.

Indicative timeline (clock starts when DECSI delivers requirements and counterparties)

PHASE	TIMING	FOCUS
Management endorsement	This presentation	Approve pack for documents and committee
Documents & committee	Next phase	Formal ToR/contract annexes; committee presentation; award
Requirements handover	Day 0 after award	Policy packs, products, hierarchy, rollout waves, CBS contact, KPIs
Configure & UAT	Weeks 1–3	Gates, catalog, committees, branding, customer API, training pack
First-wave go-live	Within ~1 month of complete requirements	Pilot / first districts live; hypercare; KPI baseline
Network scale	Months 2–6	Remaining waves, SLAs, AMC start at Month 13

6. Annual Maintenance (Year 2 onwards)

Line E — 10% yearly maintenance after the warranty year: ETB 500,000 per year including VAT. This is 10% of the agreed contract price of ETB 5,000,000. It starts when the 12-month Year-1 warranty ends, and is invoiced annually in advance.

AMC includes

- Bug fixes and security patches
- Reasonable configuration support
- Helpdesk for named DECSI counterparts
- Minor policy-gate / product parameter changes
- Version updates of the licensed product

AMC does not include

- New modules or integrations outside the agreed scope (Section 7)
- CBS vendor or third-party map/API fees
- DECSI hardware, hosting, or connectivity
- On-site work beyond agreed remote support (by written agreement)
- Data-migration from unrelated legacy systems

Indicative support response (Year 1 warranty and AMC)

SEVERITY	MEANING	RESPONSE	TARGET RESTORE
S1 — Critical	System down; no workaround; lending halted	2 business hours	8 business hours
S2 — High	Major function impaired; workaround exists	4 business hours	2 business days
S3 — Medium	Partial impairment; operations continue	1 business day	5 business days
S4 — Low	Cosmetic / how-to / enhancement request	2 business days	Agreed release

Business hours: Monday–Friday, 08:30–17:30 East Africa Time, excluding Ethiopian public holidays, unless a 24/7 rider is agreed.

7. Out-of-Scope Work — By Agreement Only

Rule: Anything outside the agreed scope in this proposal is **not** included in the ETB 5,000,000. Such work is done only after Seqela and DECSI agree in writing on scope, price, and timing.

Examples of work that would require a separate written agreement (not an exhaustive list, and not pre-priced):

- Deep CBS disbursement booking / automatic loan posting beyond customer-number lookup
- A live NBE or credit-bureau connector beyond file-level flags already in the product
- Additional on-site training waves beyond the agreed rollout plan
- 24/7 support beyond the warranty / AMC response table
- New product modules, channels, or integrations not listed in Sections 1c and 3
- Data migration from unrelated legacy systems

No out-of-scope work starts, and no extra fee is due, until both parties have signed (or otherwise recorded) that agreement. The ETB 5,000,000 including VAT remains the complete price for the agreed scope.

8. Included / Excluded

DECSI provides

- Servers / VM / backup meeting Seqela’s sizing note
- Network, SSL, and branch connectivity
- CBS API access and a named CBS counterpart
- Policy, product, committee, and catalog inputs
- Named project sponsor and working group
- Staff time for UAT and training attendance

Seqela provides

- Licensed software and deployment artefacts
- Configuration, UAT support, go-live
- Training and manuals
- Year-1 warranty and hypercare
- Project reporting suitable for committee audit

9. Value for Money & ROI

Management and committee should judge this offer against the cost of *not* locking one methodology across the network — not against a greenfield custom build.

COMPARATOR	IMPLICATION
Build equivalent in-house	12–24+ months; GPS, committee, and appraisal edge cases rediscovered; delayed factory; uncertain audit maturity
Stay on Excel + paper beside a partial tool	Uneven underwriting, committee returns, overtime, weak dossiers, slower MSME answers
This offer	Current queue/admin system already built free (53,901 files · ETB 17.03B approved). ETB 5 million <i>including</i> VAT deploys the new credit factory; 10% annual AMC after warranty; first wave ~1 month after requirements

ROI in numbers (from the current live queue system — not a guarantee of future results)

MEASURE	NUMBER
Contract price (including VAT)	ETB 5,000,000
Annual AMC after warranty (10%)	ETB 500,000 / year
Already approved on the current live queue system	ETB 17,025,387,000
Already disbursed	ETB 13 billion+
Applications already processed	53,901
Customers already approved	25,397
Contract as a share of that approved book	0.029% (≈ 0.03%)
Contract per historical application	≈ ETB 93
Contract per approved customer	≈ ETB 197
0.03% of the ETB 17.03B approved book	≈ ETB 5.1 million — covers the contract
Wait-time reduction target	50–70%
Document completeness target	95%+

Illustration — if DECSI introduces a processing fee (it does not charge one today)

DECSI currently charges **no loan processing fee**. The new Digital Apply module can collect a configurable fee (including zero / waived). If management later sets a fee of **ETB 1,000 per loan, only on approved loans**:

MEASURE	NUMBER
Fee (example)	ETB 1,000 per approved loan
Approved customers on the current live queue system	25,397
Fee income at that historical volume	ETB 25,397,000
Approved loans needed to cover the ETB 5,000,000 contract	5,000
Approved loans needed to cover 10% AMC (ETB 500,000 / year)	500 / year
Historical volume vs contract	≈ 5.1× the ETB 5 million

This is an illustration only — whether to charge a fee, the amount, and whether it applies only after approval are DECSI policy decisions. The system can collect the fee when DECSI turns it on; it can also stay at zero.

Committee message: DECSI already paid the hardest cost — shaping a live system to real credit practice. This proposal converts that into a licensed, supported, network-default factory with a 90-day commercial holdback.

10. Assumptions & DECSI Responsibilities

1. Scope is DECSI operations in Ethiopia only; affiliates or other brands are a separate license.
2. CBS integration in the agreed price is customer-number lookup / prefill. Disbursement posting or other integrations outside this scope are done only by written agreement.
3. DECSI delivers policy packs, product list, hierarchy, unit-price catalog updates, and CBS credentials on Day 0.
4. Rollout waves (which districts/branches, in which order) are agreed at contract and may be adjusted by change note.
5. LLM / Agentic Assist may use DECSI-approved keys (OpenAI-compatible or Azure). Model usage fees, if any, are DECSI's.
6. Map tile / Gebeta commercial fees, if charged to DECSI, remain DECSI's.
7. Force majeure, change of law, and NBE directive changes that require new modules are handled by written agreement (Section 7).

11. Taxes, Validity & Commercial Terms

TERM	POSITION
Currency	ETB. Invoices in ETB.
VAT	15% is included in the total price of ETB 5,000,000 (VAT portion ETB 652,174).
Withholding	If DECSI is required to withhold tax, it shall provide the official receipt so Seqela can credit the amount.
Validity	90 calendar days from 15 August 2026. After that, Seqela may revise.
Payment	Within 15 days of invoice for a completed milestone, unless the contract sets another period.
Late payment	Work on later milestones may pause if a prior invoice is overdue more than 30 days.
IP	Seqela retains ownership of the software. DECSI receives a perpetual institutional license as priced.
Data	Loan, customer, and collateral data remain DECSI's. Hosted on DECSI infrastructure.
Confidentiality	This proposal is confidential. Not for redistribution outside DECSI evaluation channels.
Governing law	Laws of the Federal Democratic Republic of Ethiopia. Venue: mutually agreed, Ethiopia.
Out of scope	Work outside the agreed scope is done only by written agreement on scope, price, and timing. No extra fee without that agreement.
AMC	10% of the contract price per year (ETB 500,000 including VAT) after the warranty year.
Contract form	To be finalized in the documents phase after management endorsement and committee direction.

12. Decision Path — Management → Documents → Committee

- 1

Now — Management presentation
Review technical proposal + this financial proposal. Confirm the commercial envelope and scope (network-wide, on-premises, perpetual license).
- 2

Next — Formal documents
Seqela issues contract-ready annexes: scope of work, acceptance criteria, rollout waves, SLA, and this price schedule. DECSI procurement / legal attach institutional terms.
- 3

Next — Committee presentation
Joint walkthrough of capability, live evidence, price, payment milestones, and value for money. Companion slide deck is included in this pack.
- 4

Thereafter — Award and Day 0
Contract / PO, requirements handover, configuration, UAT, first-wave go-live within about one month of complete requirements.

What we ask of management this session: Endorse the technical and financial pack (total **ETB 5,000,000 including VAT**) for the documents and committee phase. Name a management sponsor (Credit / IT / Finance) and the target committee date.

Seqela · info@seqela.com · +251 964 790 724 · seqela.com
Ref: SEQ/DECSI/FIN/2026-08 · Companion: SEQ/DECSI/CAPH/2026-08

Prices valid 90 days from 15 August 2026. Not a binding contract until a signed agreement or purchase order. The ETB 5,000,000 includes 15% VAT and covers the agreed scope only. Work outside that scope is done by written agreement. Annual maintenance after the warranty year is 10% of this price.
