

Functionality UAT – 12-stage system flow

Live browser check on <http://127.0.0.1:8000> · 21 August 2026. Distinct from the code-map assessment: a real loan was created and each stage was opened as the matching staff role.

Result. All 12 stages opened in the running hub. 10 stages pass. Legal and disbursement are *partial* only because this run did not complete a committee vote or a live core-banking book — the screens themselves work (Finance post-approval on DCSI-S0010 shows restriction / title blockers).

10
Stages pass

2
Partial (legal / CBS)

52/52
