

PREPARED FOR DEVELOPMENT BANK OF ETHIOPIA

Seqela · Digital solutions for banks, MFIs & SACCOs

Company. Products. iBOC. Credit Intelligence.

Who we are, what we build, then DBE iBOC — Integrated Back Office Automation & Credit Intelligence — one lifecycle, seven product engines, extending the factory already live at DECSI. 218.26 is a fund window on that platform.

Addis Ababa 8 platforms Credit Intelligence live at DECSI DBE iBOC overlay 218.26 fund window

FOUR CHAPTERS

Seqela first. iBOC where it meets DBE's credit book.

01

COMPANY

Who Seqela is

Ethiopian banking technology. Production systems for banks, MFIs, and SACCOs.

02

PRODUCTS

The eight platforms

Credit Intelligence, Digital Equb, Degaf, core banking, PLSA, School ERP, fleet.

03

DBE IBOC

Back office + seven engines

Extend the live factory: project, lease, wholesale, IFB, idea, funds. CBS stays DBE's.

04

FUND WINDOW

218.26 on the same spine

KfW/EU MSME recovery as a tagged funding window — covenants, women/youth, PAR — not a separate system.

SEQELA

Ethiopian banking technology, already in production

WHO WE ARE

Digital solutions for banks, MFIs & SACCOs

Addis Ababa. We build and run platforms for credit, deposits, core systems, community finance, and operations — one team, live products.

HOW WE DELIVER

Configure → pilot → integrate → scale

Discovery workshop, policy configuration, fixed-scope pilot, CBS / channel APIs, then network rollout. Your brand. Your gates. Your data residency.

ARCHITECTURE

Complements core banking

Where a CBS already exists, we layer the credit factory and growth products on top. Where unions and networks need a core, we deploy multipurpose or multi-tenant CBS.

ON AI

Intelligence with hard rails

AI accelerates officers. Humans and committees still decide. No auto-approve. No silent disbursement. Every assist is audited.

CATALOGUE

Eight platforms. One team.

#	PRODUCT	WHAT IT IS	STATUS
01	AI-powered Credit Intelligence / DBE iBOC	Credit factory + DFI overlay: product engines, desks, GPS, committees, CBS handoff, Assist	Production · DECSI · DBE overlay prototyped
02	Seqela Digital Equib	Rotating savings & credit — family to bank-integrated and marketplace	equb.seqela.com
03	Degaf Crowdfunding	Causes, creators, and funders on one platform	degaf.et
04	Multipurpose Core Banking	Members, savings, loans, shares for unions, SACCOs, cooperatives	Institution deploy
05	Multi-tenant Core Banking	One stack, many institutions — isolated books and branding	Network / hub
06	Prize-Linked Saving Account	Campaigns, tickets, transparent draws — principal never at risk	Campaign platform
07	Seqela School ERP	Students, fees, parents, academics, school finance	Education
08	Vehicle History & Fleet	Asset history and fleet operations for institutional control	Mobility / collateral

PORTFOLIO

Credit on the asset side. Engagement on liabilities. Core where needed.

LENDING & CREDIT QUALITY

AI-powered Credit Intelligence → DBE iBOC

MSME/corporate factory live at DECSI. For DBE: project, lease, wholesale, IFB, idea engines on the same spine. GPS, documents, committees, Assist. Works with DBE's existing core systems.

LIABILITIES & INCLUSION

Digital Equb · PLSA · Degaf

Equb at scale (equb.seqela.com), prize-linked savings, crowdfunding (degaf.et) — Ethiopian savings culture on institutional rails.

INSTITUTION SYSTEMS

Multipurpose & multi-tenant core

Full core for unions and SACCOs, or a shared hub when many institutions sit under one technology operator — relevant to DBE's PFI / cooperative partners.

ADJACENT

School ERP · Vehicle & fleet

Education operations; vehicle history for asset-backed lending and institutional fleet control.

For DBE the first wedge is iBOC internally. Equb, PLSA, and core remain available for PFI and inclusion programs. 218.26 is a fund window, not a separate product.

OPERATING MODEL

DBE runs iBOC. Seqela extends the live factory. CBS stays DBE's.

DBE

Credit-book owner

Policy bands, product families, desks, committees. Pilot iBOC internally. Core banking stays with DBE.

SEQELA

Technology operator

Extend the DECSI factory. Configure engines, desks, funds, gates. Train CRM, Appraisal, Engineering, Legal, Finance. CBS customer prefill.

SECOND WAVE

PFI on wholesale lines

Same factory on 218.26 / RUFIP / SMEFP after DBE's own book is live. Shared instance for small MFIs.

01

Pilot internally

Project + one other family (lease or wholesale). Measure 45-day first-release SLA.

02

Encode policy

Debt-equity, lease contribution, IFB markup, fund covenants as gates — not memos.

03

Donor MIS

218.26 women/youth/envelope/PAR on tagged files. Same spine, not a sidecar.

THE PRODUCT

One credit lifecycle. Product engines plugged in.

- KYC desks
- Family engine
- GPS / financed asset
- Committee
- Equity / drawdown
- Implementation
- Rehab

- 01

Family selects the desk
Project, lease, wholesale, Murabaha, Ijarah, idea — or MSME/corporate sheets where they belong.
- 02

Parallel KYC + documents
Scan/Admin plus CRM, Engineering, Legal. OCR English + Amharic. Identity match.
- 03

Policy as gates
Debt–equity, tenor, lease contribution, fund covenants. Weak files never reach committee.
- 04

Proof before the next draw
Purpose-coded tranches; implementation visits unlock release. CBS still posts money.

DBE'S CURRENT PROJECT

Support for Recovery of MSMEs in Conflict-Affected Areas

EXECUTING AGENCY

Development Bank of Ethiopia

MSME and Green Economy Programs and Projects Directorate. EU + KfW parallel finance via Ministry of Finance on-lending.

GEOGRAPHY

Tigray · Amhara · Afar

Working capital and investment: manufacturing, construction, trade, agro-processing, services.

PFIS

Banks and MFIs

7 PFIs selected in round 1. Second-round EoI for additional institutions with a branch in the three regions.

4.5%

DBE on-lending rate to PFIs

≤ 11%

PFI ceiling to MSME end-users

30%

Minimum women-owned MSMEs

FIT

The factory covers the tests this credit line already requires of PFIs

218.26 / DONOR NEED	IBOC / CREDIT INTELLIGENCE
xii · Adequate MIS	Single pipeline, role dashboards, reconstructable dossier — not Excel and paper
xiii · Credit risk & control	Mandatory 7-step appraisal, lock after submit, dual control, amount-routed committees
xiv · E&S / ESMS	Sheet 4: 21-item checklist, risk category, PASS / ACTIONS / REJECT, sign-off trail
xi · PAR >90 ≤ 10%	DSCR and stress gates before approval — origination quality that protects PAR
30% women · 20% youth	Gender and age on Sheet 1 — reportable cuts for DBE / KfW / EU utilization
Training & monitoring	Standard workflow + audit export; TA trains once across the PFI cohort
Post-conflict field	Offline tablet GPS capture; bilingual OCR; works where connectivity and records are thin

REFERENCE CASE

DECSI · Mekelle, Tigray — live Credit Intelligence book

53,901

Loan requests

29.56B

ETB requested

17.03B

ETB approved

13B+

ETB disbursed · secured MSME

CUSTOMERS

25,397 approved

1,762 rejected (ETB 1.37B). ~76% of approved amount disbursed.

WHY IT MATTERS FOR 218.26

Tigray is the mandate, not a future market

DECSI has run post-conflict rehabilitation credit since 1994. The factory already operates in that reality.

NEXT

Three decisions to start iBOC at DBE

01

SPONSORS

Name Credit, Engineering, Legal, External Fund, IT

Live walkthrough of a project file, a lease asset, and a fund/wholesale window.

02

PILOT

DBE internal — two families first

Project plus lease or wholesale. Measure days to first release. CBS stays DBE's.

03

POLICY

Debt-equity, lease, IFB, fund covenants

Give us the bands. We encode them as gates before committee.

SECOND WAVE

DEIs on 218 26 / wholesale lines

CLOSE

Seqela extends the live factory. iBOC is how DBE releases money.

53,901 files already processed at DECSI. Next: one lifecycle, seven engines, equity before loan, proof before the next draw.
