Re: Proposal — *DBE iBOC*: Integrated Back Office Automation and Credit Intelligence Platform for Development Bank of Ethiopia

Dear Sir/Madam,

On behalf of Seqela, we are pleased to submit this proposal to the Development Bank of Ethiopia. DBE is a policy development bank: project financing, lease assets the bank owns, wholesale to PFIs, donor windows, Interest-Free Banking, and idea / quasi-equity. That is not the same operating model as an MSME cashflow book — and it cannot be run as a generic loan-application system.

Seqela already operates **AI-Powered Credit Intelligence** in production at DECSI (53,901 files, ETB 17.03B approved, ETB 13B+ disbursed). We propose to **extend that live factory** into an enterprise **Integrated Back Office Automation and Credit Management System** for DBE — one credit lifecycle, seven financing product engines, Credit Intelligence as the decision layer. Core banking stays DBE's.

The platform now includes the DFI overlay: product families that select appraisal and collateral automatically; project viability (NPV/IRR, equity, plant desks, visit-gated tranches); lease/Ijarah asset register; wholesale PFI files; external-fund covenants (including KfW/EU 218.26); Murabaha and idea/equity desks; Scan/CRM/Engineering/Legal KYC; and a named rehabilitation path with a 45-day origination SLA clock.

We respectfully request DBE's decision to **pilot iBOC internally** as the credit case system of record. Partner banks and MFIs on wholesale lines remain a second-wave option once DBE's own book is live.

We are ready to present a live demonstration to Credit, Engineering, Legal, External Fund & Wholesale, IFB, and IT.

Thank you for your time and for DBE's leadership as Ethiopia's development bank.

Yours sincerely,

For Seqela
