

Functionality UAT – 12-stage system flow

Live browser check on <http://127.0.0.1:8000> · 21 August 2026 (re-run after feature updates). Distinct from the code-map assessment: a real loan was created and each stage was opened as the matching staff role.

Result. All 12 stages opened in the running hub. 10 stages pass. Legal and disbursement are *partial* because this run did not upload a new legal PDF or book live core banking — the screens themselves work (post-approval on DCSI-S0010; Finance CBS preview; remote OTP sign page).
