Re: Proposal to scale AI-powered Credit Intelligence across DECSI — cashflow MSME appraisal, GPS collateral, and multi-level committees for recovery and growth

Dear Sir/Madam,

On behalf of Seqela, we are pleased to submit this proposal for DECSI's consideration. AI-powered Credit Intelligence was designed around DECSI's own credit practices — Branch → District → Head Office routing, construction-based collateral valuation, and cashflow-based MSME appraisal — and is already proven in live DECSI operations.

The platform digitizes end-to-end secured and cashflow lending: bilingual document authentication, a seven-step MSME (and corporate) appraisal wizard faithful to the sector Excel standard, GPS-governed field collateral with offline tablet support, and configurable multi-level committee decisioning.

We propose a structured scale-up with DECSI: deepen network adoption, lock policy gates bank-wide, strengthen audit readiness, and support DECSI's recovery and resilience agenda with a credit factory officers can run every day — not parallel Excel files.

We respectfully request a working session with Credit, IT, Engineering/Collateral, and Risk leadership to agree pilot-to-network KPIs and a commercial roadmap.

Thank you for the partnership that made this system real. We look forward to scaling it with DECSI.

Yours sincerely,

For Seqela
